Key Insights

1. Sales Trend

Sales showed an overall upward trend from January 2022 to December 2024. The steepest growth occurred between 28 December 2023 and 19 August 2024, when sales rose from $36,204 to $45,315 (+25.17%, or $9,111) over 7.7 months.

2. Orders Performance

2024 recorded the highest number of orders at 2,599, which is 30.41% higher than 2022, the lowest year with 1,993 orders. 2024 accounted for 38.83% of all orders. Orders and total customers are positively correlated.

3. Customer Analysis

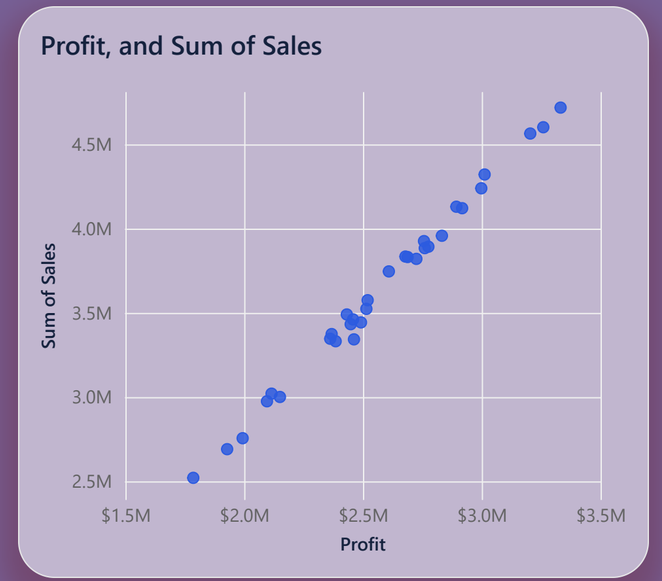

Across all 10 customers, sales ranged from $405,233 to $554,512 and profit ranged from $285,201 to $389,351. Jonathan Doherty showed the largest gap between sales and profit, with sales exceeding profit by $165,161.

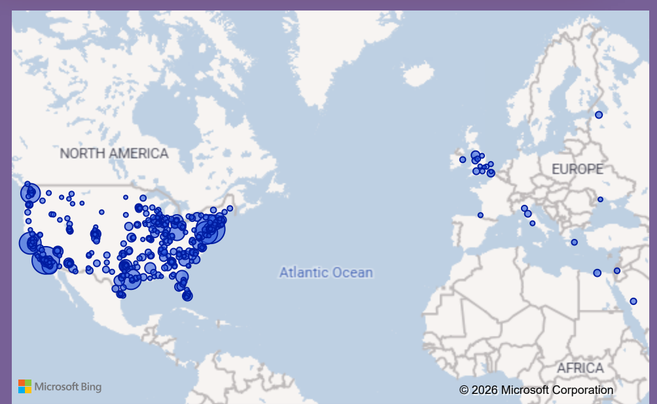

4. Anomalies

Several high and low anomalies were detected between 20 January 2022 and 31 December 2024. The most recent was a high value of $338,805 on 31 December 2024.

Conclusion

The business shows steady growth in sales and orders, with 2024 as the strongest year. Management should review the anomaly on 31 December 2024 and the profit margin of customers with a large sales-to-profit gap.

THE END

Thank You

for your time and attention

> **ACKNOWLEDGEMENT**
>
> I would like to sincerely thank my Power BI trainer, **Sir Kasheef Uddin**, for his guidance, patience and support throughout this course. His practical teaching helped me turn raw data into meaningful insights and build this dashboard with confidence.
